URMIA

TABRIZ

Tabriz is the fifth most populated city in Iran,one of the historical capitals of Iran and the present capital of East Azerbaijan Province. It is situated in the valley of Quru River and its elevation from sea level is about 1,350 meters. Tabriz is located in a valley to the north of the long ridge of the volcanic cone of Sahand, south of the Eynali mountain. The valley opens out into a plain that slopes gently down to the north eastern end of Lake Urmia, 60 kilometres (37 miles) to the west. With cold winters and temperate summers the city is considered a summer resort.

The estimated population of the city is around 3,000,000 based on results of the Iranian census bureau. Tabriz is the fifth most populous city in Iran after Tehran, Mashhad, Isfahan, and Karaj. Tabriz is a major hub for heavy industries including automobile, machine tools, oil and petrochemical and cement production.

Many monuments in the city date back to the Ilkhanid, Safavid, and Qajar periods, among them is the large Tabriz Historic Bazaar Complex which is inscribed as a World Heritage Site in 2010. The oldest signs of the civilization in the city is an excavation site and museum in the city center with a history that dates back 2500 years.

Saat Tower

The Municipality was built in 1934 as the Tabriz municipal central office. After World War II it was used by the Azerbaijan Democrat Party as a Government Office. When Iranian troops regained control of Tabriz in 1947, the building was again used as the Tabriz municipal central offices, a function which has continued up to the present day

Since Saat Tower is located in the center of the city, it has been used for various ceremonies and gatherings in the city. During 1947 it was used as the seat of the Azerbaijan Peoples' Government.
